

## ND-751T-E Intelligent Plug-in Thermal Detector

Section: Intelligent/ Addressable Devices

### General

ND-751T-E Intelligent Plug-in Thermal Detector is a new developed product by NOTIFIER® in order to meet the sophisticated market demands. This new thermal detector has embedded a Central Processing Unit (CPU), and is addressable and software addressing designed; with integral communication provide features that surpass conventional detectors. ND-751T-E detector is compatible with the NOTIFIER® N-6000 Fire Alarm Control Panel (FACP), and is used with B601 Intelligent Detector Base for connection.

ND-751T-E detector is designed to provide open area protection, which applicable for areas such as residential buildings, office complexes, schools, college campuses and any others utilities.

### Features

- Sleek, low-profile, stylish design.
- State-of-the-art thermistor technology for fast response.
- Addressable by device.
- The LED can be latched on by code command from the control panel for an alarm indication. It can also be unlatched to the normal condition by code command.
- Stable communications techniques with noise immunity.

### Specifications

- Operating Temperature : -10°C ~ 50 °C
- Relative Humidity : 10% ~ 95%RH, non-condensing
- Voltage Range : 15 ~ 32VDC
- Standby Current : ≤ 450µA
- Max. Alarm Current : 3.5mA
- Alarm Temperature: 57 °C
- Dimensions :
  - Diameter : 102mm
  - Height (including base) : 48mm
